EPA...D.L.P.C.  
STATE OF ILLINOIS

Dear Mike:

This letter is in reference to our phone conversation of yesterday concerning inspections made at the above subject landfill.

As you know, we had a compliance conference at the Illinois Environmental Protection Agency's Regional Office in Aurora, Illinois. As a result of this conference this was ultimately turned over to the Pollution Control Board and we were granted a variance to continue to dispose of refuse at our landfill and bring it into compliance.

There are several items we are being cited for by the field representatives when they make inspections of our landfill that do not apply to our site as in the past.

1. Since we are filling in swales and attempting to bring our level up to grade and are applying the proper cover on with the proper pitch so that we will have a natural water run-off, we cannot always dump at the toe of the slope.
2. Because of rainy weather there are times when we must change our dumping location from one spot to the other, since, after a large rain the trucks are unable to get the refuse in the area in which we had previously dumped. Also, the trucks hauling clay fill are not able to bring the cover material into that area and we must move to another area.

Mr. Michael W. Rapps

September 15, 1976

3. After having had rain for four or five consecutive days and the temperature rises to the high 80's and 90's, we have had some odor and if we happen to be dumping in an area near homes we are forced to move out of that area so as not to create a bad environment for those people living in these homes.

If you can supply us with a supplemental permit giving us permission to operate our landfill in this manner I am sure we will be able to do a more efficient job and bring our landfill into compliance.

Thank you for your cooperation in this matter.

Kindest personal regards, I remain

Yours very truly,

TRIEM INDUSTRIAL BUILDING OPERATIONS

Leonard C. Triem
